MESSAGE FROM THE MANAGING DIRECTOR

The concept of Responsible & Ethical Business have changed process of sustainable development globally and that makes me conscious about responsible & ethical business.

In worldwide economy, globalization which is changing our way of doing business with freer movement of products and people and today's massive privatization where corporate bodies are leading, a minor negligence by the key players in responsible sourcing will cause a huge amount of loss to the society as a whole. All the corporate bodies must voluntarily take into account social and environmental consideration when managing their relationships with other stakeholders and should not deceive them in the urge of making additional profit. There has to be a chain of commitment and responsibility for the welfare of the society which is only possible through responsible & ethical business and sourcing. This thinking and sense of responsibility are what made me passionate to set up my own business where ethics, commitment & dedication will be the priority. Not only that, it also inspired me to do something for society & community as well.

I am willing to bring this commitment to the conduct of my business and integrate my exposure to the practical and real side of responsible business to help evolve and growth of my company.

Now, when i have started doing my own business, I have given my best efforts accumulating my experience, dedication, learning and these all simply stand in one sense, The Entrust Group.

Mohammad Aktaruzzaman
Managing Director
